

HippoCam[®]

With HippoCam in combination with HippoVision you can always have an eye on the horse box of your choice, zoom in on a particular area, and do an automatic vertical or horizontal scan at a specific time.

By having an internet connection, you can view the images of the chosen horse box from the outside on a digital tablet, a phone or a computer.

The HippoCam camera is bidirectional, remote controlled, very easy to use.

One or two anti-intrusion video cameras can be installed independently of the horse boxes with video recording and detection warning email.

The strong points of HippoCam[®]

- ✓ Know exactly the position of your horse in his box.
- ✓ Detect abnormal behavior
- ✓ Monitor foaling
- ✓ Scan the box horizontally and vertically with automatic return to origin
- ✓ Zoom on drinker or feeder
- ✓ Anti-intrusion option
- ✓ Control on the PC where you can view the whole stable horse box by horse box
